The Carter County Board of Education is continuing the process of site selection for construction of a new Career Tech Center and for a potential new central high school. Due to KDE regulations and guidelines, several steps must be completed before final property selection and approval. A site cannot be purchased without KDE approval. These steps are in place to ensure the selected site(s) meet all KDE requirements for school construction. The Carter County Board of Education is continuing to make progress toward selection, but it is expected the process will continue for several more months. No final decisions have been made. The district hopes to be able to make a final determination on property selection before the end of the calendar year.

In order for the district to move forward with the planning for any new facility, site selection must be completed first. It is anticipated that planning for a potential new school facility would start in the spring of 2023. It is anticipated final decisions on facility construction won't occur until the summer or fall of 2023.
